

1 FOR IP OFFICE V9.0

With Version 9.0, Avaya now allows 3rd-party SIP devices to be added to Paging Groups.

The Source Number is added after the User and matching SIP Extensions are created. An existing **V + Extension Number** will be in the default settings. To add the source number:

- 1 Click **Add** and enter **SIP_ALLOW_PAGE**
- 2 Save the configuration to the IP Office

Note

You may have to reboot the system for the change to take effect.

2 FOR IP OFFICE V9.1

IP Office V9.1 can specify that 3rd-party SIP devices can auto answer. To set the 3rd-Party Auto Answer:

- 1 Under the VoIP tab, go to *3rd Party Auto Answer*, select **device auto answers** from the drop-down list.
